SCAN · PORTFOLIO

## PROFESSIONAL SUMMARY

Data-driven Supply Chain & Operations graduate (MSc, TIAS School for Business and Society, 2025) with 3+ years of hands-on warehouse and operations experience and a Lean Six Sigma Green Belt. Builds supply chain analytics end to end — SQL, Power BI, Tableau, Python and SAP SD (order-to-cash) case work — and pairs it with floor-level operations know-how, including a 30% operational efficiency improvement across 50+ locations at RAWEP. Combines structured analysis (PEST, SWOT, Porter's Five Forces, feasibility modelling) with practical logistics discipline. Seeking business analytics roles — business analyst, data analyst, MIS & reporting, marketing and supply chain analytics — across all sectors in India, on-site or remote.

## EDUCATION

|                                                                                                                                                                       |                                                             |
